SENATOR ALLARD ANNOUNCES \$400,349 FOR BREAST CANCER RESEARCH AT CU HEALTH SCIENCES CENTER

WASHINGTON, D.C. - U.S. Senator Wayne Allard (R-Colorado) announced on Wednesday that the National Cancer Institute has awarded a \$400,349 grant to the University of Colorado Health Sciences Center in Aurora for breast cancer research.

“I am proud that the National Cancer Institute continues to recognize the quality research being conducted at UCHSC,” Senator Allard said. “Breast cancer cases have been declining in the United States, and we can attribute this to the commitment of public and private entities to research and prevention.”

This grant will fund research in the role of progesterone receptors in breast cancer. For more information, please contact David Sprenger, Director of Federal Relations at the University of Colorado at (202) 577-6177.
